I understand that you are both planning to ask Lwoff to come for a visit in the middle west after the Cold Spring Harbor Symposium. We should very much like to have him visit us and I think we can contribute part of the cost of his trip. Unfortunately, our summer school will not start until June 22. It would be impossible to sponsor a lecture or a seminar before late in June. If, therefore, we are to contribute to Lwoff's expenses, it will have to be done on the basis of paying part of his travel rather than as an honorarium. Unless either of you has already received commitment, as to dates for his visit, we might wait to make the plans more definite until the time of the Symposium in Cold Spring Harbor. Our plans are such that we can have him visit us any time after June 15.

I shall appreciate receiving your comments. I am writing to Lwoff now mentioning that we are hoping to see him in Urbana after the Symposium.

Sincerely yours,

S. E. Luria
